Definitions:

DNA Test-Baseline—Permanent DNA record, no parentage.

DNA Test-Parentage—Permanent DNA record and parentage evaluated from Sire and Dam candidates provided by owner.

Expedited Test—Additional fee assessed to process samples, APVs or other transactions as soon as they are received. The EWA office will place all Expedited transactions in front of other regular transactions and notify the lab that those cases are to be Expedited.

Additional Parent Verification (APV)—Additional testing on previously submitted cases to further evaluate other Sire and/or Dam candidates beyond those originally tested (Individuals-up to ~20).

Additional Parent Verification + Herd Search—Additional testing on previously submitted cases to further evaluate other Sire and/or Dam candidates beyond those originally tested (Herds given rather than individuals).

Transfer Owner-Member—Animal is sold or otherwise transferred from Original Owner/Member to a New Owner/Member and registration of animal is updated in EWA Registry, whereas the New Owner is responsible for transfer fee.

Transfer Owner/Non-Member Fee—Animal is sold or otherwise transferred from Original Owner/Member to a New Owner/Non-Member and registration of animal is updated in EWA Registry, whereas the New Owner/Non-Member is responsible for the transfer fee. If New Owner chooses to become an EWA Voting Member in Good Standing, then the Transfer Owner-Member fee will be charged.

Duplicate or New Certificate—Replacement certificates or additional certificates requested by owner.

Registration Updates and Corrections—Any changes made to a registered animal such as name, picture, YOB, tag number, color, etc. that are requested to be added or changed after initial submission. If the name change of the registered animal affects additional offspring, and updated reports and certificates are requested, the fee will be charged for each animal updated.

DNA Match—Sample submitted to be matched to other already registered animals to determine which animal it may have been previously registered as.

Duplicates—Samples that are submitted that have already been registered which causes the same DNA to be identified to 2 or more animals causing additional research to determine which should be the Active case and which ones should be made Inactive. Duplicates caused by Original Owner and New Owner submitting samples on same animal, Original Owner would be charged. Duplicate submissions on the same animal by a single Owner, that Owner would be charged.

Complex Transactions—Excessive time spent on completing any work for a member may be charged an additional fee to be determined at the time of the transaction. Members will be notified if their case falls into this category prior to completing any work.
